

### Negative UX Experience

An app that I use regularly even though I dislike it is 'Moodle'. I use this app for my college to keep track of lecture uploads and assignments and their due dates.

I find this app hard to use as it can be very unresponsive at times and things aren't in the places you would expect them to be. The menus can be 'laggy' and unintuitive. The biggest flaw for me is how cluttered the app is making it hard to read and find what you are looking for.

- (1) The recently accessed items is a good idea but doesn't always actually work and sometimes will not show an item you recently used.
- (2) The timeline can get cluttered with overdue assignments that had no actual submission required for them.
- (3) The course overview is annoying to navigate.
